

LED Automatic Emergency Lantern

McGeoch Technology's **NEW** Automatic Emergency Lantern (AEL) is a solid state miniature unit utilising the very latest LED technology to provide controlled lighting over a 180° horizontal field of view. The unit is designed to illuminate for a minimum period of 6 hours following power failure. It will fully recharge within 16 hours of power being restored.

In an emergency situation, the AEL will provide clear exit lighting and with minimum maintenance, a long, trouble-free service life is guaranteed.

FEATURES

- High intensity LED technology
- Unique light reflector
- Illumination test button with LED charging indicator
- Standard voltages:
110V AC/DC and 240V AC
- Low power consumption
- High shock and vibration resistant
- Rugged, vandal-proof enclosure

APPLICATIONS

- Naval emergency lighting
- Defence emergency lighting
- Industrial health and safety lighting
- Rail vehicle safety lighting

SPECIFICATIONS

Meets and exceeds the following specifications:

- Vibration: DG Ships 350
- EMC to Defence Standard 59-41
- Operating Temperature: -40°C to +70°C
- Storage Temperature: -40°C to +100°C
- MTBF: 100,000 hours (11.5 years)
- Intrinsically safe version in progress
- Dimensions: 17cm (l) x 10cm (w) x 8cm (h)

MATERIALS

- Base housing: Cast aluminium
- Clear lens: Acrylic

NEW

Founded in Scotland in 1832, the name of McGeoch has long been synonymous with engineering quality. Dedicated throughout almost all its 160-year history to the manufacture and supply of components for harsh environments, the company has remained at the absolute forefront of engineering innovation. Nowadays it supplies a wide range of products to an equally wide array of end-users in applications worldwide.

The company operates to the very highest quality standards and holds BS5750 Part 1, ISO9000 and BASEEFA approval.

TYPICAL PRODUCTS INCLUDE
