McGeoch Technology Ltd (MTL) – COVID Update

Further to the latest UK Government announcements to mitigate the spread of the Coronavirus, we would like to update all our Customers and Suppliers on our Operations here at MTL.

MTL have been identified as a Key Supplier within the Defence Sector and as such we remain open and continue to operate as normal, albeit with enhanced safety measures which were put in place to ensure we offer a Covid secure workplace for all our staff. The wellbeing of our staff, their families and our visitors are of paramount importance and since this pandemic the following Health & Safety Procedures have been implemented and are now part of our everyday life:

- Temperature Testing prior to entering main buildings (employees and visitors).
- Social distancing measures in place across offices and shopfloors.
- Face coverings whilst moving around MTL buildings.
- Limiting number of people in meeting rooms.
- Additional cleaning implemented across all areas of the business.
- Master Covid leaflet distributed to all employees.
- Risk assessments are being carried out across working areas.
- Visitors to site only permitted via Director sign-off and for essential reasons only.

We aim to maintain all our current manufacturing schedules and delivery commitments to our customers and are working very closely with our Supply Chain to ensure we meet our obligations.

Thanks for your continued support as we work through the current situation, however, please do not hesitate to contact us should you have any questions.

Best Regards,

Lee Wrangles

Commercial Manager
